DETAILED ACTION

Drawings

The drawings filed on September 10, 2004 are acceptable subject to correction of the informalities indicated below:

In Fig. 3, the element label 62 which has a strikethrough should be erased and the corrected element label (71, currently above the label 62 with the strikethrough) should be moved down to the current position of the label 62 with the strikethrough.

Allowable Subject Matter

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose and would not suggest to one of ordinary skill in the art, in combination with the other limitations of independent claims 1, 11, 21, and 26, selecting a script based on an objective difference value between the keywords of the first portion of the threaded conversation and the selected script. Farrell (U.S. Patent 6,721,416) discloses selecting an expected customer response when detected keywords substantially match an expected customer response, but provides no indication of a second step/means for selecting an expected customer response if the detected keywords do not substantially match an expected customer response. Kneipp (U.S. Patent 6,102,970) also fails to cure this deficiency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stuart et al. (U.S. Patent Application Publication 2002/0019737) disclose a system wherein the operator repeats customer responses to a speech recognizer to retrieve a script.
